

ARTUR SANAMYAN

DATA SCIENTIST &
SOFTWARE ENGINEER

Data Science • Backend • Math

ABOUT ME

5th-semester Computer Science student at Hochschule Hannover with specialized focus on Data Science, Machine Learning, and mathematical algorithms. I develop data-driven solutions through Python, Pandas, and SQL — from data cleaning to predictive models. With a background in economics theory and statistical analysis, I combine strong mathematical foundations with practical software development to transform raw data into actionable insights.

PRACTICAL EXPERIENCE

06/2021 –
02/2022

TECHNICAL IT SUPPORT & SOFTWARE DEVELOPMENT (INTERNSHIP)

CROSS TECHNICS, YEREVAN (HYBRID)

- Conception and implementation of scripts for automating technical processes and optimizing system performance.
- Technical support and systematic troubleshooting for complex IT systems and network infrastructures.
- Maintenance, configuration, and detailed error analysis of hardware and software components in production environments.

EDUCATION & ACADEMICS

Since 10/2024

B.SC. APPLIED COMPUTER SCIENCE

HOCHSCHULE HANNOVER

Focus Areas: Database Systems (SQL), Machine Learning, AI in Software Development, Mathematical Algorithms.

02/2022 –
08/2023

INTENSIVE GERMAN COURSE

INLINGUA HANNOVER

09/2019 –
12/2021

ECONOMICS THEORY

STATE UNIVERSITY OF YEREVAN

Focus on economics theory and statistical analysis.

TECH STACK & SKILLS

Data & AI: Python, Pandas,
PowerBI

Databases: SQL

Tools: Linux, Git, Docker, Next.js

Backend: Java, C/C++

SELECTED PROJECTS

2026

HOUSE PRICE PREDICTOR (MACHINE LEARNING)

A machine learning model for predicting real estate prices. Developed with Python and Pandas for data cleaning and feature extraction.

2026

PERSONAL PORTFOLIO WEBSITE

A modern, interactive web application developed with Next.js, React, and Tailwind CSS, including dynamic state management.

2026

3D SCENE (COMPUTER GRAPHICS)

Programming of an interactive 3D scene using modern rendering techniques in C/C++.

2025

MAZE GAME (JAVA)

An object-oriented maze game developed in Java. Focus on clean architecture, game logic, and graphical rendering.
