

ARTUR SANAMYAN

COMPUTER SCIENCE STUDENT & DEVELOPER

Data Science • Backend • Machine Learning

ABOUT ME

5th-semester Computer Science student at Hochschule Hannover with specialized focus on Data Science, Machine Learning, and mathematical algorithms. I develop data-driven solutions through Python, Pandas, and SQL — from data cleaning to predictive models. With a background in economics theory and statistical analysis, I combine strong mathematical foundations with practical software development to transform raw data into actionable insights.

TECH STACK

Data & AI: Python, Pandas, PowerBI

Backend: Java, C/C++

Databases: SQL

Tools: Linux, Git

LANGUAGES

Armenian (Native)

English (Fluent)

German (Fluent)

Russian (Very Good)

PRACTICAL EXPERIENCE

06/2021 – 02/2022 TECHNICAL IT SUPPORT (INTERNSHIP) CROSS TECHNICS, YEREVAN (HYBRID)

- Technical support and systematic troubleshooting for various IT systems and networks.
- Support with maintenance, configuration, and error analysis of hardware and software components.

EDUCATION & ACADEMICS

Since 10/2024 B.SC. APPLIED COMPUTER SCIENCE HOCHSCHULE HANNOVER

Focus Areas: Database Systems (SQL), Machine Learning, AI in Software Development, Mathematical Algorithms.

02/2022 – 08/2023 INTENSIVE GERMAN COURSE INLINGUA HANNOVER

09/2019 – 12/2021 ECONOMICS THEORY STATE UNIVERSITY OF YEREVAN

Focus on economics theory and statistical analysis.

09/2016 – 08/2019 HIGH SCHOOL DIPLOMA (COMPUTER SCIENCE FOCUS) SCHOOL NO. 3 "MANUK ABEGHYAN", YEREVAN

Focus on computer technology and mathematical foundations.

SELECTED PROJECTS

2026 HOUSE PRICE PREDICTOR (MACHINE LEARNING)

A machine learning model for predicting real estate prices. Developed with Python and Pandas for data cleaning and feature extraction. Implements predictive algorithms for regression analysis.

2026 PERSONAL PORTFOLIO WEBSITE

A modern, interactive web application developed with Next.js, React, and Tailwind CSS, including dynamic state management and responsive design.

2025 MAZE GAME (JAVA)

An object-oriented maze game developed in Java. Focus on clean architecture, game logic, and graphical rendering using OOP principles.

2025 3D SCENE (COMPUTER GRAPHICS)

Programming of an interactive 3D scene for the university Computer Graphics module using modern rendering techniques and graphics libraries.
